

## General information

PWS38720241012

The DAT 700 weight transmitter rewrites the concept of high performance at a small price. This weight transmitter is practical, compact, and configurable via panel keys or the Optimization software, which can ensure configuration upload and download, as well as real-time filter viewing. The DAT 700 weight transmitter is available in serial and/or analog versions, or as a bipolar version. Various Fieldbus are available through an external module. **The load cells that can be connected to this transmitter are analog and/or amplified in voltage and current.**

Software Optimization 1.8.29: [optimization\\_weighing\\_software.zip](#)

## Technical specifications

PWS38720241012

<b>Power supply:</b>	10-30VDC protected against reverse polarity. Protection with resettable fuse
<b>Insulation:</b>	Class II
<b>Operating temperature:</b>	-10°C ± +40°C (max. non-condensing humidity 85%)
<b>Storage temperature:</b>	-20°C ± +60°C
<b>Display:</b>	numerical 6-digit red 7-segment led (h 14 mm)
<b>Dimensions:</b>	96 mm x 48 mm x 100 mm (w x h x d) (terminal blocks included)
<b>Material:</b>	self-extinguishing PPO (UL 94 V0)
<b>Electrical connection:</b>	removable screw 5.08 mm pitch terminal blocks
<b>Cell input:</b>	max 8 of 350 ohms in parallel
<b>Operating voltage:</b>	5Vdc (cell input), ± 10 V / ± 5 V (analog voltage output), 0 ± 20 mA / 4 ± 20 mA (current analog output)
<b>Output linearity:</b>	< 0.01% of full scale (cell input), 0.03% of full scale (current analog & analog voltage output)
<b>Temperature drift (Input):</b>	< 0.001% of full scale / °C (cell input), 0.002% of full scale / °C (current analog & analog voltage output)
<b>Internal Resolution:</b>	24 bits (cell input), 16 bits (both current analog and analog voltage output)
<b>Measuring range:</b>	from -7.6 mV/V to +7.6 mV/V
<b>Filter:</b>	selectable 0.1 Hz - 1000 Hz
<b>Decimal figures range:</b>	0 to 4 decimal digits
<b>Logic output:</b>	2 photo relay outputs (24 VDC/Vac one NO contact) Relay contact rating 100 mA
<b>Logic input:</b>	No. 2 opto-isolated
<b>Serial port:</b>	Rs232 half duplex, Rs485 half-duplex, USB Device for instrument programming and setting
<b>Baud rate:</b>	Up to 115 kb/s (default 9600 b/s)
<b>Fieldbus:</b>	PROFIBUS DP-V1, PROFINET, CANOPEN, ETHERNET IP, ETHERCAT, ETHERNET (with external module)
<b>Calibration:</b>	Digital from buttons (both current and analog voltage output)
<b>Impedance:</b>	minimum 10K Ohm (current analog output), maximum 300 Ohm (analog voltage output)
<b>Microcontroller:</b>	32-bit ARM Cortex M0+, 256KB Flash reprogrammable on-board by USB
<b>Data storage:</b>	32 Kbytes + optional Aliby memory (1MByte)
<b>Regulatory compliance:</b>	EN61000-6-2, EN61000-6-3 for EMC, EN61010-1 for Electrical Safety
