PWS420250222

The CMH compression load cell is made of stainless steel and it guarantees precision, strength and maximum resistance to impacts and overloads. The CMH cell has been specially designed for the industrial weighing of silos, tanks and ladles and it is used mainly in the food, chemical, pharmaceutical and steel industries. The product CMH can be customized according to customer needs, for example the compensated temperature range can be extended to  $-10 \div +90$  ° C.
