

General information

PWS1220250222

The SB shear beam load cell has excellent linearity and precision, excellent resistance to lateral loads of over 50% and has been designed for weighing hoppers and tanks and for constructing low-profile platforms. If used with the MH MOUNTING KIT mounting accessory it avoids the use of mechanical constraints. The SB cell is also equipped with watertight protection to work in severe environmental conditions and is available in a special high temperature version.
