LEVERMOUNT is the most recent and innovative mechanical assembly system for load cells for industrial weighing systems. The LEVERMOUNT weighing module has a stainless steel shear beam load cell, a base with three fixing points for maximum stability. The kit is easily adjustable for radial and tangential mounting. LEVERMOUNT does not hinder the normal expansion and contraction movements of the tank and allows the tank to be lifted independently without the aid of a jack. The load cell and the mounting component of the LEVERMOUNT product cannot be sold separately, the weighing module must be purchased in full (see image).
