The MASTERMOUNT weighing module is an aesthetically appealing product; it has a double shear beam load cell made of stainless steel and a built-in mounting component. MASTERMOUNT is ideal for weighing processes that require accurate, safe and convenient solutions and can also be used in the most hostile industrial environments as it covers most industrial process applications. MASTERMOUNT is supplied with 20 m long shielded polyurethane cables for the electrical connection. The load cell and the assembly component of the MASTERMOUNT product cannot be sold separately, the weighing module must be purchased in full (see image).
