General information

PWS7020250304

The PKD 3000 weighing instrument is a multifunction weight microcontroller used in industrial systems. The PKD 3000 weight indicator manages up to 8 load cells and up to 4 independent scales and can be connected to printers and labellers using the available control drivers. Calibration and linearization up to 8 points can be programmed directly from the digital keyboard or from a PC. The PKD 3000 weight indicator can be customized and adapted to customer needs. PKD 3000 is also available in Batch version.
